

**Insightful data.
Deeper Connections.**

Translate the brain's intricacy with **REMARKABLE CLARITY**

Integrated. Extensive. Relevant.

ADMdx offers **diagnostic tools** that enable an integrated, insightful view of the effects of disease to support medical professionals in patient care.

Our **full spectrum CRO services** for CNS imaging trials use a variety of PET and MRI biomarkers that enable us to provide early, reliable information for decision-making and clinical trial de-risking.

Advancing the brain disease landscape.

Our highly sophisticated machine learning (pattern recognition) technology, informed by our extensive database, works with standard brain images, such as MRI or PET scans, and beyond.

We are committed to sharing our growing insights and information for broader awareness via —

- Long-standing relationships with major universities and medical centers
- Extensive thought-leadership team of experienced industry professionals
- Institutional and partner collaborations with large clinical networks

Our development of proprietary, cutting-edge technologies for the analysis of patient data is resulting in unparalleled forms of brain measurement.
